PREFACE

Crime in Illinois 1974 is the sixth publication presenting a comprehensive review of the amount and extent of crime in our communities throughout the State. The crime statistical data depicted in this report was officially submitted on a monthly basis by 1034 law enforcement agencies, representing villages, municipalities, counties, colleges, universities, park districts, railroads, hospitals, and transit authorities. Three hundred thirty-five of these law enforcement agencies are very small part-time police agencies who report through the various sheriffs offices. The remaining 699 law enforcement agencies report directly to the Crime Studies Section of the Bureau of Identification, located in Springfield.

Reporting crime statistics was made mandatory by the 76th General Assembly, set forth by the Illinois Revised Statutes, Chapter 38, Section 206-8, quoted below:

206-8. Crime statistics. 8. The Department (of Law Enforcement) shall be a central repository and custodian of crime statistics for the State and it shall have all power incident there-to carry out the purposes of this Act, including the power to demand and receive cooperation in the submission of crime statistics from all units of government.

Even though the Program is mandatory by statute, it is administered to provide services to law enforcement community, public and private agencies and institutions, researchers, planners and the public regarding the analysis of crime as defined by the Illinois Revised Statutes.

Crime statistical data reported each month by law enforcement agencies is reviewed for completeness and computer processed resulting in the production of an array of agency monthly output administrative reports which are sent to the agencies. Output reports that are forwarded to law enforcement agencies, institutions, investigating commissions, planning agencies, and var-

ious Legislative Committees include: Offenses Known to the Police, Offenses Cleared or Cases Solved, Police Disposition of Persons Arrested; Stolen Property Analysis; Age, Sex and Race of Persons Arrested, Offense and Clearance Trends, Arrest Trends, Man-hour Reports, Beat Analysis, Residence of Persons Arrested, Manpower Utilization, etc. Any of these reports can be produced at the local, county, and State level and any county arrangement making up a region or district within the State. In addition, these reports are produced monthly, quarterly and annually, providing specific crime trend information for each community and the State as a whole. In addition, a wide range of reports can be produced to meet a specific agencies needs, both on a one time basis or on a continuing basis.

The Illinois-Uniform Crime Reporting Program (I-UCR) emphasizes law enforcement administration in the areas of manpower planning and deployment, budgeting, development and evaluation of crime prevention programs and manpower utilization. This problem or service orientation of the I-UCR program aids in obtaining more meaningful crime statistics in the analysis of the amount and extent of crime in our communities and consequently provides the various agencies with quantitative data to develop and evaluate prevention programs.

Since the publication of all of the statistical data is a voluminous and costly undertaking, only a part of the more general information is contained herein. To maintain a cost effective environment, more detail data is available as requested. If you should need additional information for your use, please inform the Crime Studies Section, Criminal Justice Information Services of the Illinois Bureau of Identification, 1035 Outer Park Drive West, Springfield, Illinois 62704, telephone number 217-782-7980.

INTRODUCTION

BACKGROUND

The Illinois-Uniform Crime Reporting System (I-UCR) was developed in 1971 and implemented January 1, 1972. Throughout the development phase of the I-UCR Program which involved a large segment of the law enforcement community in finalizing the data collection part of the system, it became apparent after extensive research that the agencies required more comprehensive data than required for the National Program. Secondly, it was discovered during the development phase that if statistical data was to be meaningful to law enforcement agencies, other functions of criminal justice, the Legislature and investigating commissions; etc., the data should be identified with the criminal code which defines criminal deviant behavior. Thirdly, it was very important to relate crime statistical data to the National Program in order to relate to the Nation as a whole as well as adhering to the National Program's standards. Fourthly, the law enforcement agencies needed administrative statistics in return for submitting data to the State.

This is the substance upon which the I-UCR System was designed. It was developed to satisfy the above needs of the law enforcement community, planning agencies, the Legislature, education institutions, various commission and a multitude of criminal justice agencies. Moreover, the development of the Criminal Justice Information System (CJIS) requires that a common language be used for all agencies — a common language that can be identified to the task to be performed. This task is the enforcement of those portions of the Illinois Revised Statutes which define criminal acts. Thus, all statistical data rests on a uniform foundation. This same data can be easily translated to the National Program. Additionally, the I-UCR system was designed to be compatible with all components of criminal justice, including those agencies at the National level of government in view of the development of the Criminal Justice Information System (CJIS).

In order to accomplish the task of orienting the I-UCR to both the State and National levels, it was only necessary to intercept statistical data prior to the FBI or National UCR system of classification. In the FBI-UCR Manual, each classification of a statistical offense definition describes what state laws generally comprise each offense code. For example; Attempted Murder, Aggravated Assault, and Aggravated Battery make up the FBI-UCR Aggravated Assault classification. The I-UCR system collects Attempted Murder, Aggravated Assault and Aggravated Battery separately because these offenses represent different State Statutes. The I-UCR system automatically translates these three offenses uniformly into the FBI-UCR offense classification. Consequently, this enables the system to produce both State and National reports that are meaningful to everyone.

The statistical information collected was deepened considerably in comparison with the National Program by including all criminal statutes (excepting a very few) in the reporting such that the codes were uniform for all offenses, police and court dispositions and age, sex and race statistical data. This approach provided a uniform track through the police process, terminating with the prosecution. The expansion of the I-UCR crime codes was mainly suggested by many of our law enforcement agencies to gather and disseminate statistical data in other major categories of crime in addition to the commonly publicized Crime Index.

To satisfy the need for better and more comprehensive statistical analysis all reports were made monthly. These same data are summarized at the county levels, various regional planning levels and the State in the same manner. All data is translated into the FBI-UCR Program monthly on computer tapes which are forwarded to the FBI in accordance with conformance criteria established at the National level.

As a service to all law enforcement agencies, the I-UCR encompasses 128 service codes. Presently, 331 agencies use these codes, providing them with total activity accountability. These are non-crime related activities of police, such as assisting other agencies, quasi-criminal investigations, and public service. In 1974 the number of service classifications was increased to 284 to meet the statistical needs of law enforcement agencies. For example, in the year 1974, the service code activity average was 76% of the total law enforcement activity, leaving approximately 24% for criminal activity and a few serious vehicle code offenses. These are very important numbers when we are used to looking at the Crime Index only (7 offenses) and relate the index to the number of officers per 1,000 population and consequently police efficiency. What needs to be accomplished is full activity reporting for the general public to better understand the police role in a given community as well as to assist local law enforcement agencies from a police administrative point of view in a uniform manner.

In connection with crime and service activity the agency has an option to enter manhours expended, by type activity, badge number, case number, beat and block (sub-jurisdictional areas), mobility code of persons arrested (that is, residence out of jurisdiction), and items stolen in any particular offense. With these data the I-UCR Program can produce manhour utilization reports, officer activity, beat analysis by time of day, by type crime, by type property and place being attacked in a multitude of arrangements. These data are used for planning and research, budget accountability, forecasting and substantiation, and manpower determination and deployment, as well as meeting the needs of the State and the standards set by the National Program.

There are two ways in which law enforcement agencies can submit crime statistics. One way is by a fixed format tally method similar to the concept used by the FBI-UCR Group. The second way is by direct case entry. That is, as offenses and arrests occur the agency using the second method simply enters case summary information. The choice of the method of reporting depending upon their needs rests with the agency. And if the agency wants to change method of reporting, it may do so at any time other than during a particular month.

OFFENSE CLASSIFICATIONS

The Illinois-Uniform Crime Reporting (I-UCR) offense classification structure is similar to the National Program, excepting that State Statutes are used rather than uniform offense definitions. The following is a list of offense classifications and statute reference used for reporting offense and arrest information.

ILLINOIS-UNIFORM CRIME REPORTING OFFENSE CODES

CODE	OFFENSE CLASSIFICATION	STATUTE
	HOMICIDE	
0110	Murder	38-9-1
0121	Attempt: Firearm	38-8-4
0122	Attempt: Knife or Cutting Instrument	38-8-4
0123	Attempt: Other Dangerous Weapons	38-8-4
0124	Attempt: Hands, Fists, Feet, Etc.	38-8-4
0130	Voluntary Manslaughter	38-9-2
0141	Involuntary Manslaughter & Reckless Homicide Non-Vehicle	38-9-3a
0142	Involuntary Manslaughter & Reckless Homicide Vehicle	38-9-3b
	FORCIBLE RAPE	
0211	Forcible Rape: Firearm	38-11-1

OFFENSE CLASSIFICATIONS—
NATIONAL PROGRAM

The National Program for uniform crime reporting defines seven offenses for offense reporting. These offenses are listed below.

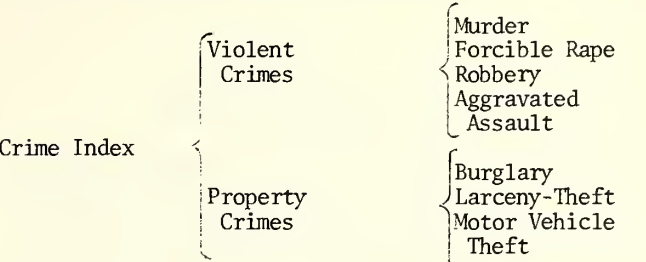

- 1. Criminal Homicide
 - *a. Murder and Nonnegligent Manslaughter
 - b. Manslaughter by Negligence
- *2. Forcible Rape
 - a. Rape by Force
 - b. Attempts to Commit Forcible Rape
- *3. Robbery
 - a. Firearm
 - b. Knife or Cutting Instrument
 - c. Other Dangerous Weapons
 - d. Strong-Arm (Hands, Fists, Feet, Etc.)
- 4. Assault
 - *a. Firearm
 - *b. Knife or Cutting Instrument
 - *c. Other Dangerous Weapon
 - *d. Hands, Fist, Feet, Etc.—Aggravated Injury
 - e. Other Assaults—Simple, Not Aggravated
- *5. Burglary
 - a. Forcible Entry
 - b. Unlawful Entry—No Force
 - c. Attempted Forcible Entry
- *6. Larceny—Theft (Except Motor Vehicle Theft)
- *7. Motor Vehicle Theft
 - a. Autos
 - b. Trucks and Buses
 - c. Other Vehicles

*Indicates an Index Offense by National Definitions

Those offenses that make up the Crime Index are asterisked in the list above. It should be noted that in those categories of offenses that do not contain a sub-category for Attempts, the Attempts are scored as if the crime was completed excepting Murder and Non-negligent Manslaughter. In this case an Attempted Murder is scored as an Assault. In contrast, the I-UCR Program has sub-codes in every category to bring out all Attempts. The reason for not summarizing crime codes is to maintain a statistic of completed as well as incompleated crimes. For example, Motor Vehicle Theft in the National Program includes both completed and incompleated Motor Vehicle Thefts. On the one hand the vehicle was stolen and the owner was deprived of his property. On the other hand an Attempted Vehicle Theft does not deprive the owner of his property nor does it require follow-up investigation to recover the vehicle. The I-UCR Program collects Attempts separately for each crime category, however, when I-UCR data is translated in FBI-UCR format, Attempts are included. The reader should be aware of this when reading Crime Index material.

CRIME INDEX

The Crime Index has been used for many years to indicate the amount and extent of serious crimes as defined by the International Association of Chiefs of Police (IACP), Committee on Uniform Crime Reports. The Crime Index consists of seven offenses which are sub-divided into Violent Crimes or Crimes Against Persons, and Property Crimes or Crimes Against Property. The Crime Index is illustrated below:

The total of all crimes committed in these seven categories is defined as the Crime Index.

The Crime Rate is defined as the total number of crimes per 1,000,000 inhabitants and is calculated as follows:

Crime Rate = $\frac{\text{Crime Index} \times 100,000}{\text{Jurisdictional Population}}$

The jurisdictional population can be a city, town, county, state or the Nation.

One basic difference between the Other Cities and Rural is population density and the opportunity to commit a crime is greater in the cities than Rural Areas. Table 46 provides additional information for comparison purposes at the summary level.

TRANSLATING I-UCR STATISTICS

It was mentioned before that I-UCR statistical data is translated into the National Program offense classifications. To better understand what you will be reading in this publication, the following illustration should help clarify how state statutes are translated into the National Program's crime index offenses.

I-UCR PROGRAM	NATIONAL PROGRAM
Murder and Voluntary Manslaughter	Murder and Non-negligent Manslaughter
Forcible Rape	Rape by Force
Robbery	Robbery
Attempted Murder	Assault
Aggravated Assault	
Aggravated Battery	
Burglary	Burglary
Theft	Larceny-Theft
Burglary From Motor Vehicle	
Motor Vehicle Theft	Motor Vehicle Theft

It should be understood from the illustration that the Assault category of the National Program contains Attempted Murder, Aggravated Assault and Aggravated Battery. And Burglary From Motor Vehicle is treated as a Larceny-Theft. In this report part of the I-UCR statistical data is translated into the Crime Index for continuity with the National level. In addition, this report contains offense and arrest data in terms of State statutes for continuity throughout the Illinois Criminal Justice System and in particular activity that relates to law enforcement.

INTER-AGENCY COMPARISONS

When making comparisons of crime statistics between jurisdictions, many factors should be considered before drawing any conclusions. Most releases of crime statistics especially the Crime Index show a population or population group relationship which leads one to compare jurisdictions based on population alone and consequently arrive at false conclusions. For example, there are many jurisdictions that have approximately the same population, however, how many jurisdictions with the same population have a race track, or large manufacturing area or mostly residential, or have a large number of hotels and motels? The point is when comparing crime statistics, one must have at least a general understanding of the characteristics of each community to intelligently derive cogent conclusions. Another aspect of crime trends in a particular community is the fact that criminal deviant behavior is a community problem that requires more than the police department to understand and curtail. The law enforcement community can only deal with those factors under its control, whereas, other agencies and institutions must deal with the entire problem in cooperation with law enforcement in conjunction with contributing factors which lead to crime. Some of these factors are listed below:

1. Density and size of the community population and the metropolitan area of which it is a part.
2. Composition of the population with reference particularly to age, sex and race.
3. Economic status and mores of the population.

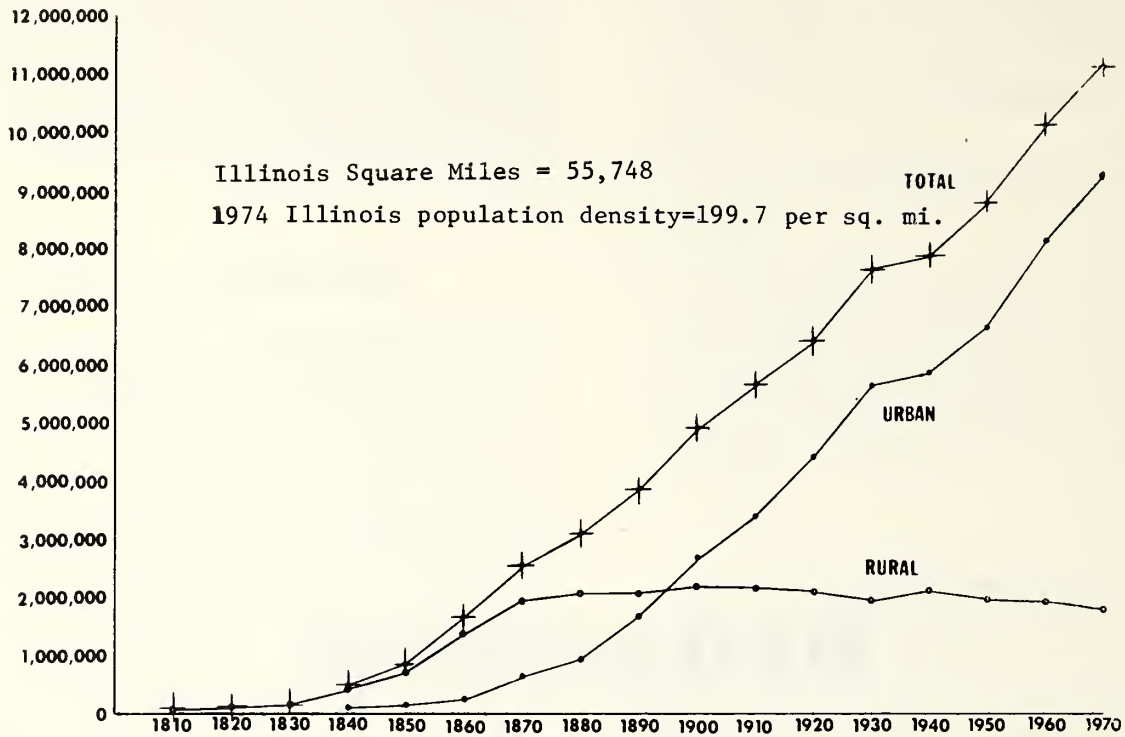

4. Relative stability of population, including commuters, seasonal and other transient types.
5. Climate, including seasonal weather conditions.
6. Education and recreational characteristics.
7. Effective strength of the police force.
8. Standards governing appointments to the police force.
9. Policies of the prosecuting officials and the courts.
10. Attitudes of the public toward law enforcement problems.
11. The administrative and investigative efficiency of the local law enforcement agency, the level of services performed other than combating and preventing crime, and the degree of adherence to crime reporting standards to measure the amount and extent of crime over long periods of time.
12. The degree of inter-agency cooperation in combating crime.
13. Public official's attitudes toward law enforcement, including the law enforcement agency's involvement in the community planning process.

Most of these factors are environmental and should necessarily be considered, however, criminal deviant behavior is complex involving sociological, psychological, biological, pathological, physiological, etc. factors comingled in one degree or another to produce the criminal deviant. And each kind of crime committed is defined differently by statute and hence requires analysis of deviant behavior by definition. For example, one that viciously commits rape has different personality traits perhaps than one who commits theft to meet family needs because he is out of a job.

It is not an easy task to consider all of these factors when reviewing crime statistics, mainly because data isn't readily available to perform such an analysis nor is there a direct correlation presented herein to reflect a more meaningful statistic. In any event, caution should be taken so as not to draw erroneous conclusions based on the population or your jurisdiction alone; consider total community factors in each comparison situation.

STATE SUMMARY

Illinois Population Trends 1810-1974

<u>YEAR</u>	<u>URBAN</u>	<u>RURAL</u>	<u>TOTAL</u>	<u>POPULATION DENSITY PER SQUARE MILE</u>
1810		12,282	12,282	*
1820		55,211	55,211	1.0
1830		157,445	157,445	2.8

Figure 1

STATE SUMMARY

The Crime Index discussed in the introduction consists of seven statistical classifications as defined by the National Program. These are, Murder and Voluntary Manslaughter, Forcible Rape, Robbery, Aggravated Assault, Burglary, Theft/Larceny and Vehicle Theft. Violent Crimes consist of Murder and Voluntary Manslaughter, Forcible Rape, Robbery, and Aggravated Assault. The statistical classifications; Burglary, Theft/Larceny and Vehicle Theft represent the remaining offense classifications of the Crime Index, and are termed Property Crimes. The relationship between the Illinois-Uniform Crime Reporting (I-UCR) offense classifications and the National offense classifications is illustrated below:

	CRIME INDEX OFFENSES ILLINOIS CLASSIFICATIONS	FBI-UCR CLASSIFICATIONS
VIOLENT CRIMES	Murder (Chapter 38-9-1)	Murder & Nonnegligent Manslaughter
	Voluntary Manslaughter (Chapter 38-9-2)	
	Rape (Chapter 38-11-1)	Forcible Rape
	Robbery (Chapter 38-18-1)	Robbery
	Armed Robbery (Chapter 38-18-2)	
	Attempted Murder (Chapter 38-8-4)	Aggravated Assault
	Aggravated Assault (Chapter 38-12-2)	
PROPERTY CRIMES	Aggravated Battery (Chapter 38-12-4)	
	Burglary (Chapter 38-19-1)	Burglary
	Burglary From Auto (Chapter 38-16-1)	Theft/Larceny
	Theft (Chapter 38-16-1)	Vehicle Theft
	Vehicle Theft (Chapter 38-16-1)	

Crime Index Offenses include attempts to commit these offenses. For example, Attempted Murder is included with the completed offense count of Aggravated Assault and Attempted Vehicle Theft is included in the total Vehicle Theft counts. The discussion and analysis of offenses that occurred in 1974 will include both the National Program and State Program statistics for a better understanding of the Crime Index. The data presented represents offenses known and reported by the 1034 law enforcement agencies in the State; of which report directly to the State and 335 very small agencies that report through the 102 Sheriff offices. During calendar year 1974 law enforcement agencies reported 564,569 index offenses, representing a 17.1 percent increase over 1973. Violent Crimes accounted for 12.2 percent of the Crime index in 1974, representing an increase of 9.4 percent over 1973. Property Crimes accounted for 87.8 percent of the Index Offenses, representing an increase of 18.3 percent over 1973. Murder and Voluntary Manslaughter increased 14.0 percent in 1974 over 1973. Forcible Rape increased 14.3 percent. Robbery increased 11.5 percent and Aggravated Assault (Attempted Murder, Aggravated Battery, Aggravated Assault) increased 65 percent. Burglary increased 20.9 percent in 1974 over 1973. Theft increased 21.1 percent and Motor Vehicle Theft increased 1.5 percent. In summary, all index

offenses increased in 1974. The State Crime Rate (number of index offenses per 100,000 inhabitants) for 1974 was 5,072, an increase of 17.6 percent over 1973. Table 1 presents Crime Index offenses and rates for 1974 and 1973.

The highest increase in Violent Crimes was Forcible Rape representing 14.3 percent. Theft was highest in Property Crimes representing 21.1 percent and accounted for the highest increase in all Index Crimes for 1974 over 1973. Vehicle Theft had the lowest increase in 1974 from 1973.

Chart 1 depicts the Total Crime Index Trend beginning with 1965 through 1974. The Chart indicates that the Crime Index is up 78 percent over 1965 and the Crime Rate is up 68 percent. The table below the graph represents the data from which the points on the graph were plotted.

	POPULATION	CHANGE	CRIME INDEX	CHANGE	CRIME RATE	CHANGE
1965	10,644,000	Base	270,983	Base	2,545.9	Base
1966	10,722,000	+ 0.7	295,847	+ 9.2	2,759.3	+ 8.4
1967	10,893,000	+ 2.3	317,045	+ 17.0	2,910.5	+ 14.3
1968	10,974,000	+ 3.1	355,322	+ 31.1	3,237.9	+ 27.2
1969	11,047,000	+ 3.8	383,161	+ 41.4	3,468.5	+ 36.2
1970	11,113,976	+ 4.4	420,086	+ 55.0	3,779.8	+ 48.5
1971	11,182,000	+ 5.1	435,018	+ 60.5	3,890.3	+ 52.8
1972	11,244,000	+ 5.6	429,529	+ 58.5	3,820.1	+ 50.0
1973	11,176,000	+ 5.0	481,927	+ 77.8	4,312.2	+ 69.4
1974	11,131,000	+ 4.6	564,569	+108.3	5,072.0	+ 99.2

Crime Rate=Crime Index per 100,000 population.

CRIME INDEX=MURDER & VOLUNTARY MANSLAUGHTER, FORCIBLE RAPE, ROBBERY, AGGRAVATED ASSAULT-BATTERY & ATTEMPTED MURDER, BURGLARY, THEFT & MOTOR VEHICLE THEFT

Note: As of January 1, 1973 the theft category was changed to include all thefts regardless of dollar value. Therefore the theft offenses from 1965 - 1972 have been adjusted to include all theft (both under \$50, over \$50 and attempts).

Table 1—Crime Index—1974

OFFENSE	OFFENSES			RATE*		
	1974	1973	% CHANGE	1974	1973	% CHANGE

CRIME INDEX ARRESTS

There were 119,653 persons arrested for Index Crimes in 1974. Males represented 99,172 arrests or 82.9 percent of the total persons arrested. Females accounted for 20,481 persons arrested or 17.1 percent. Whites accounted for 55,140 persons arrested, 46.1 percent, Negroes 57,579 or 48.1 percent, and all other races 6,934 or 5.8 percent. Juveniles accounted for persons arrested or 35.1 percent of the total arrests made for Crime Index offenses. Adults accounted for 77,600 persons arrested or 64.9 percent. Tables 2 and 3 provide detail information regarding persons arrested for Index offenses in 1974 and 1973.

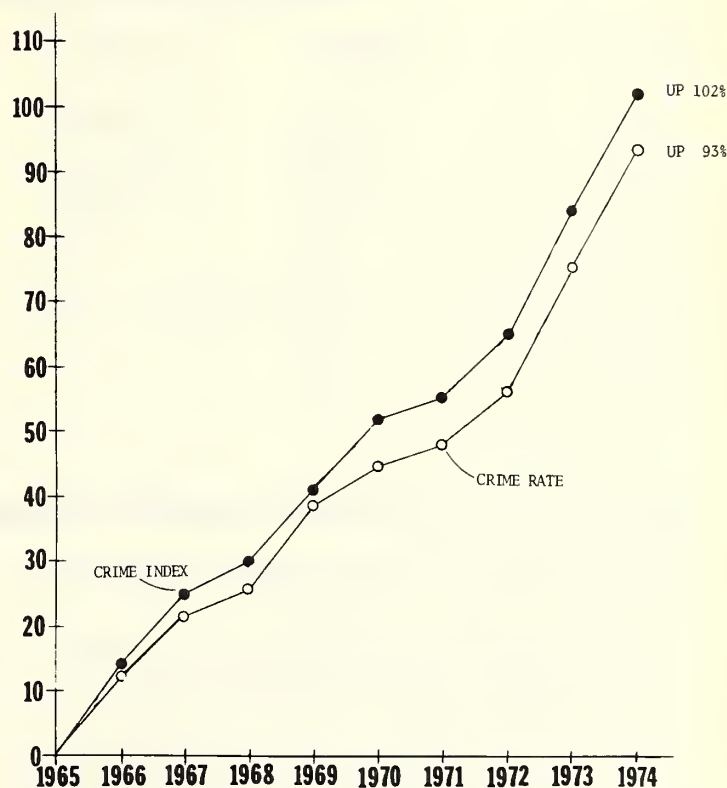

CRIMES AGAINST PERSONS

Crime Against Persons consist of Murder and Voluntary Manslaughter, Rape, Robbery, Aggravated Assault, Aggravated Battery and Attempted Murder. The total Violent Crimes that occurred in 1974 was 69,303 Chart 2 depicts the long term trend and specific data of violent crimes beginning with the year 1965. Violent Crimes were up 101.8 per cent in 1974 over the base year 1965 representing a 9.4 percent increase over 1973.

VIOLENT CRIME ARRESTS

Arrests made for offenses within the Crimes Against Persons or Violent Crime category represented 25,766 or 21.5 percent of all arrests made for Index offenses in 1974. Males accounted for 23,655 arrests for Violent Crimes or 91.8 percent, and Females accounted for 2,111 arrests or 8.2 percent. Whites accounted for 9,106 persons arrested for violent crimes, 35.3 percent, Negroes 14,969 or 58.1 percent, and all other races represented 1691 or 6.5 percent. Juveniles accounted for 5,132 persons arrested, or 19.9 percent and adults 20,634 or 80.1 percent. Tables 4 and 5 provide a detailed breakdown of persons arrested for Crimes Against Persons in 1974 and 1973.

**Chart 2

MURDER AND VOLUNTARY MANSLAUGHTER

Murder is defined in the Illinois Revised Statutes-1974, Chapter 38, Section 9-1, as follows:

9-1. § 9-1. Murder. A person who kills an individual without lawful justification commits murder if, in performing the acts which cause the death:

- (1) He either intends to kill or do great bodily harm to that individual or another, or knows that such acts will cause death to that individual or another; or
- (2) He knows that such acts create a strong probability of death or great bodily harm to that individual or another; or
- (3) He is attempting or committing a forcible felony other than voluntary manslaughter.

Voluntary Manslaughter is defined as follows:

9-2. § 9-2. Voluntary Manslaughter. A person who kills an individual without lawful justification commits voluntary manslaughter if at the time of the killing he is acting under a sudden intense passion resulting from serious provocation by:

- (1) The individual killed, or

- (2) Another whom the offender endeavors to kill, but he negligently or accidentally causes the death of the individual killed.

Serious provocation is conduct sufficient to excite an intense passion in a reasonable person.

The Crime Index offenses for Murder and Voluntary Manslaughter are merged in accordance with the National Program definition and are based solely on police investigation. Law enforcement agencies reported 1,283 Murders and 36 Voluntary Manslaughters in 1974, representing a 14 percent increase in the Aggravated Assault category in accordance with the National Program definitions.

The long term trend of Murder and Voluntary Manslaughter is illustrated in Chart 2.1. The offenses increased 139.4 in 1974 over 1965 and 14.0 percent over 1973. A detail analysis of these crimes indicates that Murder and Voluntary Manslaughter is difficult to prevent by law enforcement alone, since the majority of these offenses are committed by persons known to the victim. Table 6 displays incidents of Murder and Voluntary Manslaughter by month of occurrence, comparing 1974 with 1973. The right side of the table is partitioned into three categories of victim-offender relationships.

Type I, the victim and offender are within the family which accounted for 189 offenses in 1973 and 187 in 1974, representing decrease of 1.1 percent in 1974 over 1973. Type I Murders and Voluntary Manslaughters represent approximately 14.2 percent of the total offenses committed on the average, in this crime category. In Type II victim-offender relationship, the victim and offender were acquainted prior to the offense occurring, representing 474 cases in 1973 and 593 cases in 1974 for an increase of 25.1 percent in 1974 over 1973.

Type I and Type II together accounted for 663 cases or 57.4 percent of the total offenses committed in 1972, and in 1973 these two categories consisting of the victim and offender knowing each other, accounted for 780 cases reported or 59.1 percent of the total Murders and Voluntary Manslaughters committed, representing a 17.6 percent increase in 1974 over 1973.

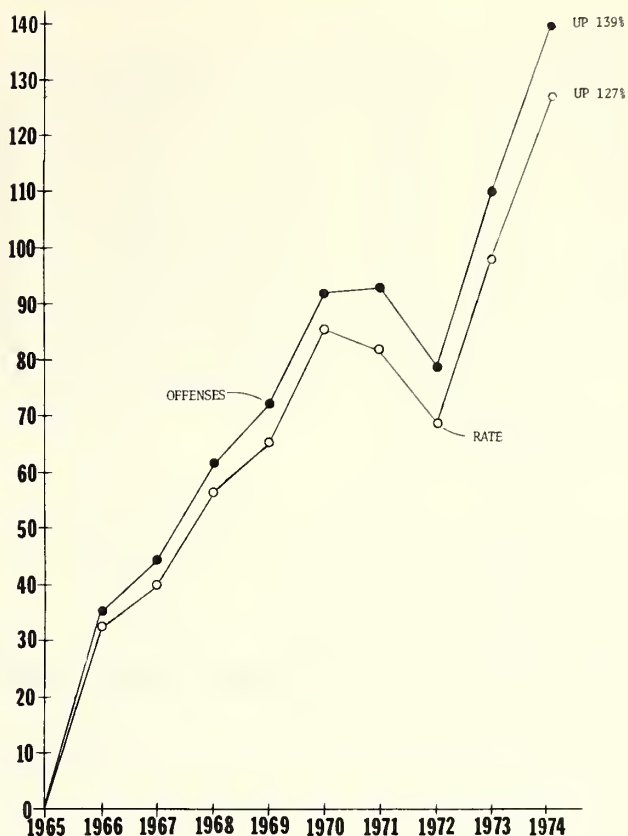

In Type III, the offender and victim are unknown to each other and represented approximately 40.8 percent of the cases reported on the average. There were 493 cases of Murder and Voluntary Manslaughter in 1973 and 539 cases in 1974, accounting for a 9.3 percent increase in 1974 over 1973. Table VII illustrates Murder and Voluntary Manslaughter occurrences by month for 1974 and 1973.

Table 7 Murder and Voluntary Manslaughter, Victim, Sex and Race; provides an analysis of victim sex and race by month of occurrence. Male victims represent approximately 79.1 percent of the cases and females represented approximately 20.9 percent. Male victims increased 16.3 percent in 1974 over 1973, and Females increased 67 percent over the same period. White victims accounted for 35.8 percent of the cases in 1974. Black victims represented 62.5 percent.

An analysis of Murder and Voluntary Manslaughter by type weapon used in committing the crime is presented in Table 8. The use of handguns to commit Murder and Voluntary Manslaughter remains the most frequent type weapon used. In 1973, 61.3 percent of the offenses committed, involved a handgun and in 1974, 60.7 percent of the cases involved the same type weapon with little change over the past three years. Incidents involving a knife as the murder weapon increased from 15.2 percent of the total cases in 1973 to 17.1 percent in 1974. The use of a club which includes any blunt instrument, increased from 5.7 percent of the cases in 1973 to 5.8 percent in 1974. The use of hands, fists, feet or any other part of the body used in the crime declined from 5.6 percent in 1973 to 3.5 percent of the total cases in 1974. All other type weapons or instruments accounted for approximately 5 percent of the cases.

Handguns, rifles and shotguns together accounted for 820 of the offenses in 1973 or 70.9 percent, and in 1973 the use of these firearms accounted for 905 cases, representing 68.6 percent of the total Murders and Voluntary Manslaughters.

TOTAL 1,264

MURDERS AND VOLUNTARY MANSLAUGHTERS—1974 Reported by Other Agencies

1. NORTHERN ILLINOIS UNIVERSITY

1

MURDER AND VOLUNTARY MANSLAUGHTER ARRESTS

The total persons arrested for Murder and Voluntary Manslaughter in 1974 was 1,460 representing 5.7 percent of the Violent Crime category and 1.2 percent of the arrests made for all Index Crimes. Males represented 1,304 or 89.3 percent of the arrests and Females 156 or 10.7 percent of the arrests. Whites accounted for 291 or 19.9 percent and Blacks or Negroes accounted for 1,010 or 69.2 percent of the total arrests. Table 9 and 10 provide additional statistical data of persons arrested for this offense for 1974 and 1973 for comparison purposes.

RAPE

The crime of rape is defined in Chapter 38, Section 11-1 of the Illinois Revised Statutes-1974. Paragraph (a) (2) is a deviation from the National Program definition and is accommodated by a subcategory of other sex offenses. The Section reads as follows:

11-1. § 11-1. Rape. (a) A male person of the age of 14 years and upwards who has sexual intercourse with a female, not his wife, by force and against her will, commits rape. Intercourse by force and against her will includes, but is not limited to, any intercourse which occurs in the following situations:

- (1) Where the female is unconscious; or
- (2) Where the female is so mentally deranged or deficient that she cannot give effective consent to intercourse.

(b) Sexual intercourse occurs when there is any penetration of the female sex organ by the male sex organ.

There were 3053 Rapes in 1973. Rapes accounted for 0.5 percent of the Crime Index and 4.4 percent of the Crimes Against Persons category. Rape offenses increased by 14.3 percent in 1974 over 1973. The Crime Rate for Rape was 27.4 per 100,000 inhabitants representing an increase in Crime Rate of 14.6 percent in 1974 over 1973.

RAPE ARRESTS

Tables 13 and 14 display detailed statistics of persons arrested for Rape. In 1974, Table 13 shows that 1,227 persons were arrested for Rape, and in 1973 there were 1,127 arrests representing an increase in arrests of 8.9 percent. Adults accounted for 1069 arrests in 1973 or 87.1 percent, and Juveniles represented 158 arrests or 12.9 percent of the total arrests made.

AGGRAVATED ASSAULT AGGRAVATED BATTERY ATTEMPTED MURDER

These three offenses make up the Aggravated Assault category of the National Program. These offenses are defined in the Illinois Revised Statutes, 1974, Chapter 38, as follows:

12.2 Aggravated Assault. A person commits an aggravated assault, when, in committing an assault, he:

- (1) Uses a deadly weapon.

Other sub-paragraphs of this statute are accounted for in the I-UCR Program under a sub-category in order to be consistent with the National Program. The intent here is to threaten great bodily harm both at the State and National level regarding Index Crimes. Aggravated Battery is the furtherance of the Assault whereby physical contact is made resulting in great bodily harm. Aggravated Battery is defined in the Illinois Statutes, Chapter 38, as:

12-4. Aggravated Battery. (a) A person who, in committing a battery, intentionally or knowingly causes great bodily harm, or permanent disability or disfigurement commits aggravated battery.

- (b) Uses a deadly weapon

- (c) A person who administers to an individual or causes him to take, without his consent or by threat or deception, and for other than medical

purposes, any intoxicating, poisonous, stupefying, narcotic or anesthetic substance commits aggravated battery.

All other sub-paragraphs in this Statute are included in other sub-codes of the Illinois-Uniform Crime Reporting Program to maintain consistency with the National Program.

Attempted Murder is defined the same as Murder excepting that the offense wasn't completed but the intention was by his acts to complete the offense, which is covered in the Illinois Revised Statutes, 1974, Chapter 38, Section 8-4.

It is important for the reader to understand that when reading statistics published by the National Program that the Crime Index category, Aggravated Assault, includes the above State Statutes. Statistics relating directly to each State Statute of the Criminal Law of Illinois can be found elsewhere in this report. See the Table of Contents, Offense Summary.

The three offenses defined above which are included in the Aggravated Assault category of the National Program, accounted for 30,230 offenses in 1974, representing 6.5 percent increase over 1973. This category of the Crime Index and 44.8 percent of the Violent Crimes.

The Crime Rate for Aggravated Assault (Aggravated Assault, Aggravated Battery, and Attempted Murder) was 271.6 offenses or victims per 100,000 inhabitants in 1974, representing an increase of 7.0 percent over 1973.

Chart 2.3
AGGRAVATED ASSAULT BATTERY
AND
ATTEMPTED MURDER
PERCENT CHANGE FROM
1965-1974

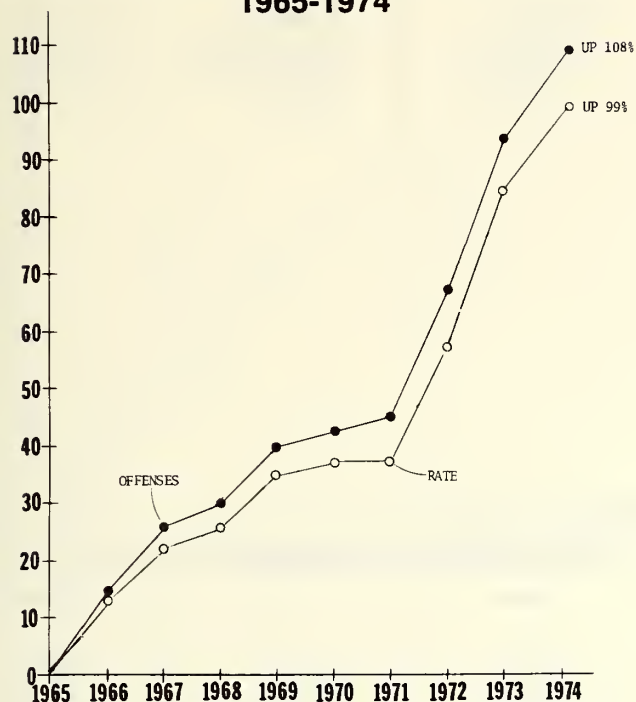

Table 13 shows the type weapon used in committing Attempted Murder, Aggravated Battery and Aggravated Assault. Firearms were used in 7,410 or 24.5 percent of the incidents; a knife or cutting instrument was used in 7,393 or 24.5 percent of the offenses; other dangerous weapons (club, rope, iron bar, pipe, etc.) were used in 6,333 or 20.9 percent of the crimes; and hands, fist, feet, etc., were used in 9,094 or 30.1 percent of the cases in 1974. Note that the table reflects the use of Firearms in Attempted Murder and Aggravated Assault as the highest for these two offenses.

The volume of offenses in 1974 was 30,230 and in 1973 the volume was 28,381 offenses representing an increase in volume of 1,849 or 16.5 percent in 1974, and 107.7 percent over 1965 as illustrated in Chart 2.3.

AGGRAVATED ASSAULT, AGGRAVATED BATTERY AND ATTEMPTED MURDER ARRESTS

Persons arrested for Aggravated Assault, Aggravated Battery and Attempted Murder amounted to 11,947 in 1974 and 11,811 in 1983, representing an increase of 1.3 percent. Adults accounted for 9,794 or 82 percent of the total persons arrested, and Juveniles made up 2,153 or 18 percent of the arrests in 1974 for these offenses. Males represented 88.2 percent of the arrests and Females accounted for 11.8 percent of the arrests. Whites represented 6,457 arrests or 54 percent; Blacks or Negroes accounted for 40 percent or 4,790 arrests were distributed among the other races shown in Table 14. Table 15 provides the arrest data for 1973 for comparison purposes.

	POPULATION	% CHANGE	AGGRAVATED ASSAULT & BATTERY & ATT. MURD.	% CHANGE	AGGRAVATED ASSAULT & BATTERY & ATT. MURD. RATE	% CHANGE

ROBBERY

Robbery is usually included in the Property Offense sub-category of the Crime Index. However, Robbery by definition includes assault and/or battery with the intent to deprive the person of property or commit a theft. It is considered in the Illinois-UCR Program as a Violent Crime Against Persons. The State Statute is quoted below from Chapter 38 of the Illinois Revised Statutes-1974:

18-1. Robbery. (a) A person commits robbery when he takes property from the person or presence of another by the use of force or by threatening the imminent use of force.

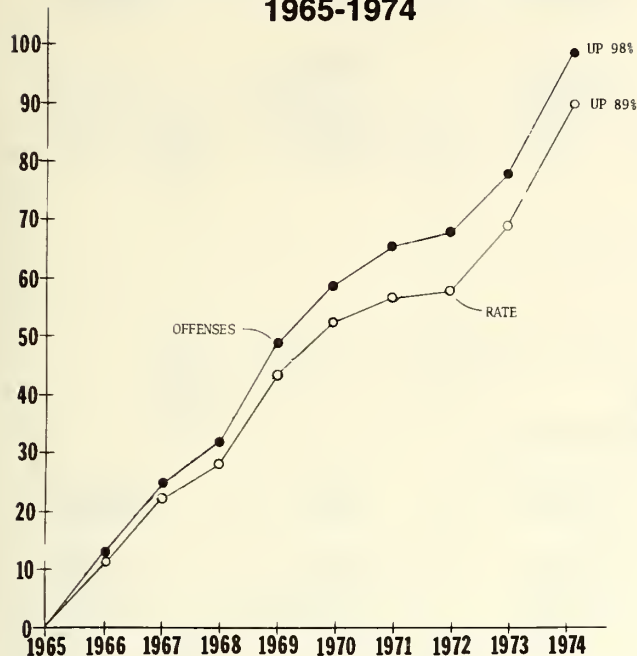

18-2. Armed Robbery. (a) A person commits armed robbery when he violates Section 18-1 while armed with a dangerous weapon.

From the definition of Robbery one can conclude that an Assault or Battery, both of which can be Aggravated is committed concurrently with the intent to deprive a person of his property. For example; if a person points a gun at an individual with a threat to do great bodily harm which is present by the display of the gun it could be

termed an Aggravated Battery. However, if the offender takes property from the person it is Armed Robbery. Likewise, if an individual grabs a purse it could be considered a common theft called purse-snatching. However, if the individual strikes you with his fist or any other weapon intended to produce force, it is a Robbery. As a result Robbery is more importantly classified as a Violent Crime or Crime Against Persons than being classified as a Property Crime. Obtaining property is the intent of the offense.

There were 34,701 Robberies in 1974 representing an increase of 11.5 percent over 1973. Robbery accounts for 50.1 percent of the Crimes Against persons and 6.1 percent of the Crime Index. The Crime Rate for Robbery was 311.8 offenses per 100,000 inhabitants representing an increase of 11.9 percent over 1973. Chart 2.4 shows the ten year trend for Robbery, indicating that offenses were up 97.6 percent and the Crime Rate was up 89.2 percent over 1965 considered the base year for computation. Specific statistical data is presented in Chart 2.4.

Chart 2.4

1974	11,131,000	+ 4.6	34,701	+ 97.6	311.8	+ 89.2

Crime Rate = Crime Index per 100,000 population.

————— "CALCULATED" trend line for Crime Index.

- - - - - "CALCULATED" trend line for Crime Rate.

Illinois population for 1973 is Bureau of Census provisional estimates as of July 1.

Table 16 provides a detailed breakdown of Robbery by type weapon used and those Robberies that were committed by using a certain degree of force called strong-armed robbery.

Accordingly, there were 22,885 Armed Robberies in 1974 which represented 65.9 percent of the total robberies committed, not considering the 464 Attempts to commit Armed Robbery.

ROBBERY ARRESTS

Tables 17 and 18 displays detailed data of persons arrested for Robbery in 1974 and 1973. There were 11,132 persons arrested in 1974 for Robbery and 9,663 persons arrested in 1973, representing 15.2 percent increase in arrests in 1974 over 1973. Males accounted for 10,585 out of the 11,132 arrests in 1974, representing 95.1 percent of the total. Juveniles represented 2,716 or 24.4 percent of the 1974 arrests and Adults made up 8,416 or 75.6 percent. Whites accounted for 2,050 or 18.4 percent and Blacks or Negroes represented 8,344 or 75.8 percent of the arrests, while the remaining arrests were distributed among other races.

Property involved in committing Robbery amounted to 7,137,222 in 1974. Out of the total value of property stolen, \$1,238,128 worth of property was recovered, and \$11,742 in property was destroyed. Table 19 provides an analysis of Robbery by Place or location of occurrence. The total offenses reported indicates 33,502 which is 1,199 offenses less than the Crime Index shows. The difference of 1,199 is made up of 947 offenses which were attempts and are not included. The remaining 252 offenses were not reported by law enforcement agencies for one reason or another, with respect to the property stolen, however, the offenses were reported as an offense only without property analysis. In looking at the Table, Robbery occurrences on thoroughfares is highest at 50.1 percent of the total, followed by business place and private residences.

CRIMES AGAINST PROPERTY

Included in this sub-category of the Crime Index is Burglary, Theft and Auto Theft. The National Program includes Robbery as mentioned previously. In addition to these three property crimes, Arson and Vandalism will be considered separately in this section to avoid confusion between Index crimes and other crimes that are on the State Program.

Property crimes amounted to 495,267 incidents in 1974 compared to 418,583 in 1973, amounting to an increase of 16,684 offenses an 18.3 percent increase. The Crime Rate for Crimes Against Property was 4,449.4 an 18.3 percent increase. The Crime Rate for Crimes Against Property was 4,449.4 offenses per 100,000 inhabitants in 1974, representing an increase of 10.8 percent over 1973. Property crimes accounted for 87.7 percent of the Crime Index offenses in 1974 and 86.9 percent in 1973, indicating only a slight increase in volume relative to the Index itself.

The total value of property stolen was \$170,243,245 in 1974 for these three offenses, compared to 135,890,632 in 1973, amounting to an increase of 25.2 percent in 1974 over 1973. Property recovered amounted to \$58,167,181 in 1974, accounting for 43.9 percent of the property stolen. In 1973, property value recovered was \$59,643,385 representing 35.9 percent of the total property taken. Table 20 displays a summary of property offenses as related to the type crime and value of property.

Chart 3, depicts the long-range trend of Crimes Against Property and other property offenses. The Crimes against property offenses are up 109.3 percent over 1965 and the Crime Rate for property crimes is up 100.1 percent over 1965.

CRIMES AGAINST PROPERTY ARRESTS

In 1974 there were 93,887 persons arrested for Crimes Against Property and 78,519 arrested in 1973, representing an increase of 19.6 percent in 1974 compared to 1973. Male arrestees accounted for 75,517 arrests in 1974, or 80.4 percent of the total persons arrested. Females accounted for 18,370 arrests or 19.6 percent in 1974. Juveniles made up 36,921 arrests or 39.3 percent and Adults accounted for 56,966 arrests for 60.7 percent.

It is known that whether the crime is serious or not juvenile statistics are not necessarily reported because such statistics are "sensitive." However, one can't begin solving a problem if the problem is not portrayed in perspective regarding the amount and extent of offenses committed by Juveniles. Therefore, the statistics reported here for 1974 are understated for the Juvenile category of arrests. Concerning race statistics, whites accounted for 46,034 persons arrested in 1974 or 49.3 percent, Blacks or Negroes accounted for arrests or 45.4 percent of the total arrests made for Crimes Against Property, and the remaining arrests were distributed among the other races as indicated in Tables 21 and 22.

Crime Rate = Crime Index per 100,000 population.

CRIMES AGAINST PROPERTY = BURGLARY, THEFT & MOTOR VEHICLE THEFT

NOTE: As of January 1, 1973 the theft category was changed to include all thefts regardless of dollar value. Therefore the theft offenses from 1965 - 1972 have been adjusted to include all theft (both under \$50, over \$50 and attempts).

BURGLARY

The crime of Burglary is defined in the Illinois Revised Statutes-1974, Chapter 38, Section 19-1, as:

19-1. § Burglary. A person commits burglary when without authority he knowingly enters or without authority remains within a building, house trailer, watercraft, aircraft, motor vehicle as defined in The Illinois Vehicle Code, railroad car, or any part thereof, with intent to commit therein a felony or theft.

The National Program does not include in its definition of Burglary, Burglary from Vehicles, such as, autos, trucks, trailers, aircraft; etc., and in order to be consistent with the National Program this Statute had to be divided between Burglary from Building or Structure and Burglary from Vehicle in order to collect and disseminate statistics by State Law. The I-UCR Program has two categories of Burglary; viz., Burglary from Vehicle and Burglary. The Burglary from Vehicle is treated as a Theft on National level in the Index Crime called Theft/Larceny. Therefore, when reviewing the Crime Index one should understand what type of offenses defined by State law make up the various categories of the Crime Index.

Burglaries (not including Burglary from Vehicle) accounted for 138,770 offenses in 1974, representing an increase in volume of 23,966 offenses over 1973 or an increase of 20.9 percent. Chart 3.1 shows the long-term trend beginning with 1965 as the base year. The number of offenses increased by 136.9 percent over 1965 and the Crime Rate for Burglary increased by 126.5 percent over the same period of time. In 1974, 74.3 percent of the burglaries were committed for forcible entries, representing 103,160 offenses. Unlawful entries amounted to 24,659 offenses or 17.8 percent of the total burglaries. Included in Burglary Index Crimes are Attempts to commit burglary, amounting to 10,951 offenses or 7.9 percent of the total offenses.

The clearance rate (number of crimes solved/total crimes occurred) for Burglary in 1974 was 18 percent. This low figure, of course, is not satisfactory to the law enforcement community. Burglary requires concentrated effort within each community to develop programs that will severely reduce and prevent burglaries

from occurring. The Illinois-Uniform Crime Reporting Program is assisting law enforcement agencies through the analysis of this and other crimes in terms of beat analysis, time of day of occurrence, analysis of persons arrested and residency, stolen property and location analysis; etc.

BURGLARY ARRESTS

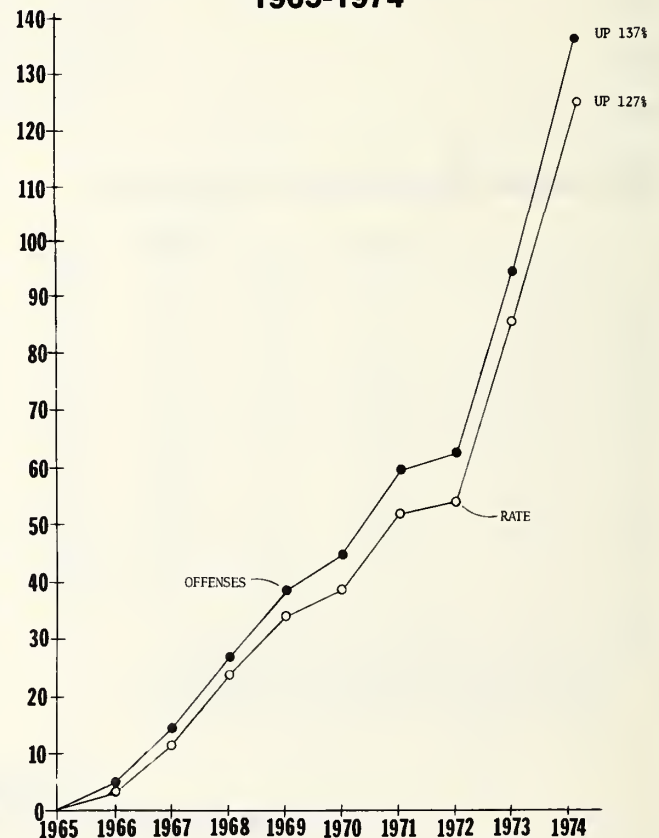

In 1974, there were 22,512 persons arrested for Burglary and 19,355 persons arrested in 1973, representing an increase of 16.3 percent. Males represented 96.3 percent of the persons arrested in 1974, and Females accounted for 3.7 percent. Table 23 also shows that Adult represented 58.7 percent of the persons arrested for Burglary in 1974 and Juveniles made up 41.3 percent. Juvenile arrests for Burglary increased by 9.1 percent in 1974 over 1973. (See Table 24) The race distribution showed Whites accounting for 10,931 arrests or 48.6 percent, Blacks or Negroes made up 10,015 persons arrested or 44.5 percent, while the remaining 6.9 percent was distributed among all other races, as Table 23 indicates.

STOLEN AND RECOVERED PROPERTY—BURGLARY

In 1974, Burglary accounted for 55,290,474 worth of stolen property, representing an increase over 1973 of \$14,652,363 or 36.1 percent. Recovered property amounted to \$3,229,185 or 5.8 percent in 1974.

Table 25 displays places where burglaries occurred in 1974, by time of day and percent distribution. The total burglaries that occurred in residences represented 51.6 percent of 65,162 incidences. Day time burglary from residence occurred 47.1 percent, Night time burglary from residence occurred 35.5 percent of the time and 17.4 percent were unknown; i.e., the person was away from home and upon discovery of missing property or a forcible entry the victim could not tell investigating officers when the crime occurred. However, what is noteworthy is the high percent of Day time burglaries of residences. This simply means that persons committing these acts are aware that occupants are at work, on vacation, out of town, etc. This situation in turn raises the question how to prevent burglaries; i.e., what can

the home owner or occupant do in cooperation with the police to prevent residential burglaries.

Type property stolen, recovered or destroyed related to Burglary is presented in Table 26. Currency ranked highest in property value stolen, followed by jewelry.

BURGLARY FROM MOTOR VEHICLE

It was mentioned previously that the National Program requires that burglaries from vehicles be recorded as a theft. However, our State Statutes do not permit this. To accommodate both the State and National requirements, a separate offense code is used to record these offenses. Translation of State data into the National Program crime definitions require merging Burglary From Motor Vehicle into the Theft category of the Crime Index. Therefore, when reviewing Index data, it should be remembered that Index Crimes do not necessarily relate to Illinois Criminal Law as was mentioned previously under Aggravated Assault. Consequently, data related to Theft as defined by the National Program will have burglary from motor vehicle data included. However, a separate analysis of this specific crime will be presented in the following section.

THEFT

Theft is defined in the Illinois Criminal Code, Chapter 38, Section 16-1 as:

16-1. Theft. A person commits theft when he knowingly:

- (a) Obtains or exerts unauthorized control over property of the owners; or
- (b) Obtains by deception control over property of the owner; or
- (c) Obtains by threat control over property of the owner; or
- (d) Obtains control over stolen property knowing the property to have been stolen by another or under such circumstances as would reasonably induce him to believe that the property was stolen, and
 - (1) Intends to deprive the owner permanently of the use or benefit of the property; or
 - (2) Knowingly uses, conceals or abandons the property in such manner as to deprive the owner permanently of such use or benefit; or
 - (3) Uses, conceals, or abandons the property knowing such use, concealment or abandonment probably will deprive the owner permanently of such use or benefit.

Included in the figures that follow is burglary from motor vehicle which will be treated separately within this section.

The number of Thefts that occurred in 1974 was 297,858 representing 52.8 percent of the Index Crimes and 60.1 percent of Crimes Against Property. Theft increased 21.1 percent over 1973, causing a corresponding increase in the Theft Crime Rate of 1974 amounting to 2,675.9 offenses per 100,000 inhabitants or 21.6 percent increase over 1973. Thefts over \$150 (a class 3 felony) accounted for 17.2 percent of the total thefts and 80.8 percent of the offenses reported were under \$150. Attempts accounted for the remaining offenses reported.

The total offenses that were cleared (solved) amounted to 70,685 giving a Clearance Rate of 23.7 percent.

Theft offenses increased 116.4 percent over the base year of 1965 as illustrated in Chart 3.2 and the Crime Rate for Theft increased 106.9 percent over the same ten-year period. Specific data by year is presented in the table below the chart showing a ten-year history of theft offenses and rate per 100,000 inhabitants.

**CHART 3.2

1967	10,893,000	+ 2.3	161,876	+ 17.6	1,486.1	+ 14.9
1968	10,974,000	+ 3.1	187,133	+ 36.0	1,705.2	+ 31.9
1969	11,047,000	+ 3.8	199,600	+ 45.0	1,806.8	+ 39.9
1970	11,113,976	+ 4.4	225,462	+ 63.8	2,028.6	+ 56.9
1971	11,182,000	+ 5.1	234,644	+ 70.5	2,098.4	+ 62.3
1972	11,244,000	+ 5.6	227,296	+ 65.1	2,021.5	+ 56.3
1973	11,176,300	+ 5.0	246,003	+ 78.7	2,201.2	+ 70.2
1974	11,131,000	+ 4.6	297,858	+116.4	2,675.9	+106.9

Crime Rate = Crime Index per 100,000 population.

NOTE: As of January 1, 1973 the theft category was changed to include all thefts regardless of dollar value. Therefore the theft offenses from 1965 - 1972 have been adjusted to include all theft (both under \$50, over \$50 and attempts).

THEFT ARRESTS

There were 65,527 persons arrested for theft in 1974 representing an increase of 23.1 percent over 1973. Males accounted for 73.7 percent of the total persons arrested for theft in 1974 and 73.0 percent in 1973 according to Tables 27 and 28. Females made up 27.0 percent in 1973 and 26.3 percent in 1974, indicating a 20.1 percent increase in female arrests for theft in 1974 compared to 1973.

Adults accounted for 40,079 arrests or 61.2 percent in 1974, and Juveniles represented 23,448 or 388 percent. Whites made up 49.3 percent of the persons arrested and Blacks or Negroes accounted for 45.6 percent with the remaining arrests distributed among all other races.

PROPERTY STOLEN AND RECOVERED

The crime of theft accounted for 34,701,589 in stolen property in 1974, representing an increase of 33.3 percent over 1973. Purse snatching increased from 10,670 incidents in 1973 to 11,815 offenses in 1974 representing an increase of 10.7 percent. The value of property taken in purse snatchings was \$695.00 in 1974 and \$553,491 in 1973. Shoplifting made up 24,051 offenses in 1973 which amounted to \$862,990, and 1974 shoplifting accounted for 29,535 offenses and \$125,698 in property stolen. In relation to time when offenses occurred, 37.9 percent occurred during the day time, 32.7 percent during the night time and the remaining were unknown. Residences were highest in places where offenses occurred accounting for 34,465 events or 17.7 percent, followed by Buildings making up 10.3 percent, Business Place at Commercial at 11.4 percent, Highway-Streets-Alleys, etc., accounting for 10.3 percent, Chain Stores representing 8.7 percent.

The type property being taken by Day, Night and Unknown with value of property stolen, recovered and destroyed is displayed in Table 30. Currency had the highest value of stolen property at 3,437,066 followed by bicycles at 2,759,588. Since more than one item can be stolen in an offense, number of items is presented, rather than offenses.

The following is an analysis of Burglary from Vehicle. It was mentioned before that the offenses collected against this portion of the Burglary Statute are translated into the Theft classification of the National Uniform Crime Reporting Program. Therefore, the offenses reported for Theft also include Burglary from Vehicle. However, all property analysis statistics, such as Table 29 and 30 discussed above only pertain to Theft by State statute. Consequently, the following discussion regarding property involvement in committing Burglary from Vehicle is separate and distinct from the data presented under Theft.

BURGLARY FROM VEHICLE

In 1974, law enforcement agencies, other than the City of Chicago, reported 29,919 Burglaries from Vehicle, representing an 16.5 percent increase over 1973. The value of property stolen from motor vehicles in 1974 was

TOTAL	34956	61779	25145	121880	5,609,686	237,383	59,046

\$5,609,686 and in 1973 the property value amounted to \$3,623,004, which indicates an increase of 54.8 percent in 1974 compared to 1973.

Table 31 displays the place associated with the vehicle at which the offense occurred by time of day and percent distribution. Highways, streets, and alleys account for the highest number of offenses, making up 35 percent of the total; followed by new or used car lots which accounted for 32.6 percent of the total offenses.

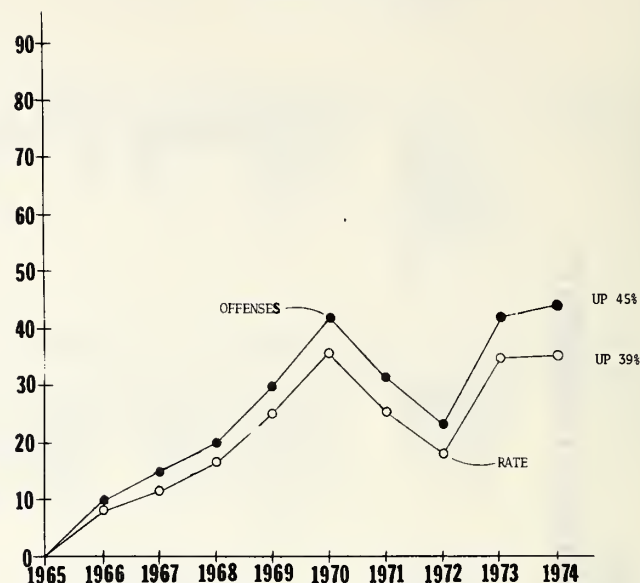

Table 32 presents detailed information regarding the kind of property stolen from vehicles (autos, trucks, trailers, etc.) and the value of each type property stolen from vehicles (autos, trucks, trailers, etc.) and the value of each type property. Tape Decks stand out as the highest followed by furs.

MOTOR VEHICLE THEFT

Motor Vehicle Thefts rose from 57,776 offenses in 1973 to 58,638 offenses in 1974, representing an increase of 8,862 offenses or 1.5 percent in 1974 over 1973. The Clearance Rate (cases closed or solved divided by total offenses occurred) for 1973 was 19 percent and in 1974 it was 14 percent.

Motor Vehicle Theft accounts for 10.2 percent of the Index Crimes and 11.7 percent of Crimes Against Property. The Crime Rate for Motor Vehicle was 526.8 offenses per 100,000 inhabitants in 1974, indicating an increase of 1.9 percent over 1973 Motor Vehicle Thefts increased by 45 percent in 1974 over 1965 as indicated in Chart 3.3. The Crime Rate is up 387 percent in 1974 over 1965. Specific information by year is contained in the table below the chart for your convenience and comparison purposes.

Chart 3.3
MOTOR VEHICLE THEFT
PERCENT CHANGE FROM 1965
1965-1974

MOTOR VEHICLE THEFT ARRESTS

Persons arrested for Motor Vehicle Theft in 1974 amounted to 5,848 arrests, and in 1973, 5,916 arrests were made. Persons arrested for this offense declined by 1.1 percent in view of a 1.5 percent rise in Vehicle Theft offenses in 1974. Adults accounted for 3,679, representing 62.9 percent and 37.1 percent respectively. Whites accounted for 47.8 percent of the arrests in 1974, Blacks or Negroes represented 46.7 percent, the remaining arrests were distributed among the other races. Tables 33 and 34 present the 1974 and 1973 arrest data.

	POPULATION		MOTOR VEHICLE THEFT		MOTOR VEHICLE THEFT RATE

Crime Rate = Crime Index per 100,000 population.

PROPERTY STOLEN AND RECOVERED

The stolen value of vehicles amounted to 74,641,496. Value recovered amounted to 50,323,597 in 1974, accounting for 67.4 percent of the total value stolen. In 1973, 75.4 percent of the total value of vehicles was recovered. Table 35 displays the locations of vehicles when they were stolen. The percent distribution column of total offenses committed indicates 13.7 percent were stolen when parked on highways, streets and alleys, followed by 11.8 percent stolen from residences. The place called Other accounted for 65.0 percent which

means that vehicles were stolen from places other than those listed and a certain amount of the 65.6 percent were not recorded properly.

VANDALISM

The term Vandalism is used in the National Program and includes a broad range of malicious behavior, such as; cutting auto tires, drawing obscene pictures on public restroom walls, smashing windows, destroying school records, etc. The Illinois-Uniform Crime Reporting Program includes the following State Statutes quoted from Chapter 38 of the Illinois Revised Statutes:

21-1. Criminal Damage to Property. Any of the following acts shall be a Class A misdemeanor and any act enumerated in sub-section (a) or

- (f) when the damage to property exceeds \$150 shall be a Class 4 felony;
- (a) Knowingly damages any property of another without his consent; or
- (b) Recklessly by means of fire or explosive damages property of another; or
- (c) Knowingly starts a fire on the land of another without his consent; or
- (d) Knowingly injures a domestic animal of another without his consent; or
- (e) Knowingly deposits on the land or in the building of another, without his consent, any stink bomb or any offensive smelling compound and thereby intends to interfere with the use by another of the land or building.

- (f) Damages any property, other than property described in Sub-section 20-1 (3), with intent to defraud an insurer.

For statistical analysis purposes this Statute is divided into parts; viz., (1) Criminal Damage to Property and (2) Criminal Damage to Vehicle.

21-4. § 21-4. Criminal Damage to State Supported Property. Any of the following acts is a Class A misdemeanor when the damage to property is \$500 or less, and any such act is a Class 4 felony when the damage to property exceeds \$500:

- (a) Knowingly damages any property supported in whole or in part with State funds or Federal funds administered or granted through State agencies without the consent of the State; or
- (b) Knowingly, by means of fire or explosive damages property supported in whole or in part with State funds or Federal funds administered or granted through State agencies; or
- (c) Knowingly starts a fire on property supported in whole or in part with State funds or federal funds administered or granted through State agencies without the consent of the State; or
- (d) Knowingly deposits on land or in a building supported in whole or in part with State funds, or Federal funds administered or granted through State agencies without the consent of the State, any stink bomb or any offensive

smelling compound and thereby intends to interfere with the use by another of the land or building.

Arresting persons committing the crime is as difficult as apprehending a thief or burglar. The clearance rate (offenses or cases cleared divided by total offenses that occurred) was 13.6 percent in 1974.

VANDALISM ARRESTS

The number of persons arrested for vandalism in 1974 was 16,200 and in 1973 there were 14,466 representing a decrease of 12.0 percent in 1974 over 1973. Males accounted for most arrests made in 1974, representing 95.9 percent of the total persons arrested, and in 1973, males represented 92.3 percent of the total arrests that year. Adults accounted for 7,119 persons arrested for vandalism in 1974, making up 43.9 percent, whereas juveniles represented 56.1 percent. In 1972 juveniles accounted for approximately the same percentage, representing 59.6 percent of the total persons arrested. Tables 37 and 38 show the distribution of persons arrested in 1974 and 1973 by sex, race, juvenile and adult age groups for comparison purposes.

Offenses that occur in accordance with these two Statutes is equivalent to the National Program's Vandalism. It should be understood that the following statistics are not part of the Crime Index offenses, and are presented because of general interest. The City of Chicago does not report these offenses, but it does report arrests in the general Vandalism category but not by Statute.

In 1974, 110,597 offenses of Vandalism were reported, representing a 31.2 percent increase over 1972. Out of the 110,597 offenses reported by law enforcement agencies in 1974, 77,301 were reported with the type place attacked. The property value destroyed increased from \$4,585,603 in 1973 to \$6,715,194 representing an 46.6 percent increase in 1974 over 1973. Property is destroyed in other property crimes such as burglary, theft, auto theft, arson, et., however, these offenses are specific for criminal damage to property which is mostly malicious and intentional.

Table 30 displays places where vandalism takes place by Day, Night and Unknown time. The percent distribution shows that residences were attacked 33.6 percent of times when criminal damage to property occurred, followed by thoroughfares and business places.

CRIME INDEX

1974/1973

In this section of the report, the Crime Index is displayed for all law enforcement agencies, showing 1974 compared to 1973. The first table, Table 39, is in alphabetical order by county and law enforcement jurisdiction within the county and law enforcement jurisdiction within county. Some of the agencies have a numeric indicator preceding the year. The meaning of the numeric indicator preceding the year. The meaning of the numeric indicators is located at the bottom of each page. The indicator, number 1—One Or More Months Data Missing, means that the indicated agency did not submit one or more of the required monthly reports for one reason or another. Number 2, No Index Crimes, means that the agency submitted all reports but didn't experience an Index Crime throughout the year. Number 3 — No Return From Agency, means that the agency did not submit any of the required reports for the year indicated. Numeric indicator number 4 — Reported Thru Other Agency, means that the agency submitted incidents of crime primarily through the Sheriff Office. Agencies that report in this manner are very small part-time agencies.

It was mentioned in the Introduction that there are many social factors that are related to crime. In making community comparisons these contributing factors must be considered in addition to the community's residential population which is used to calculate the Crime Rate. Communities like Bedford Park and McCook in Cook County have very small populations but have a very

large moving population because they are manufacturing areas.

Likewise, Rosemont in Cook County is located adjacent to O'Hare Airport and has a relatively large transient population due to the number of motels within the jurisdiction. As a consequence those large moving populations attract criminal behavior that occurs within these small jurisdictions, and therefore must be reported by each of the law enforcement agencies. The Crime Rate calculation does not compensate for a moving population and when one reads Index material it appears that the crimes are committed by the residents of the community which is not necessarily the case. In conclusion, caution should be exercised when reviewing and using these data.

The last page of the Crime Index shown in Table 39, contains three totals; viz., State Totals, Sheriffs (not county) and Police Departments. The State Total indicates a 17.1 percent increase in Index Crimes in 1974 compared to 1973. The Sheriffs total shows a 21.9 percent increase in crime and Police Departments accounted for a 16.7 percent increase in crime in 1974 over 1973. The 16 percent increase indicated by the Sheriffs total is not necessarily indicative of an increase in Rural Crime to this extent, as Rural areas are defined by the U.S. Bureau of Census which will be discussed shortly in this section. Table 40 displays annual 1974 statistics reported by Universities and Colleges.

Standard Metropolitan Statistical Areas

SOURCE: U.S. BUREAU OF THE CENSUS

FIGURE 2

STANDARD METROPOLITAN STATISTICAL AREAS (SMSA)

Standard Metropolitan Statistical Areas (SMSA's) are defined by the U.S. Bureau of the Census as follows:

A Standard Metropolitan Statistical Area (SMSA) includes a city of more than 50,000 and the county in which the city is located plus other cities which exhibit strong ties with the city. The county sheriff's office is also included for crime reporting purposes.

A core city is within an SMSA and has a population of more than 50,000 or more inhabitants. In certain SMSA's, there are "twin central cities" that have a combined population of 50,000 or more inhabitants and together are considered a core city.

The suburban area consists of cities and towns with 50,000 or less population including the counties which are within the SMSA. The county sheriff's office is included in the suburban area.

The rural area is the unincorporated portion of a county outside of the SMSA's. For Illinois-Uniform Crime Reporting purposes, the rural area is composed of the sheriff's jurisdiction outside of the SMSA's.

The other cities are urban places outside of the SMSA's. For Illinois-Uniform Crime Reporting purposes, these are cities and towns outside the SMSA's, surrounded by rural areas that are not under the jurisdiction of the county sheriff's offices.

Figure 2 is a map of Illinois with the SMSA's outlined with heavy lines. Two of the SMSA's overlap with Iowa and Missouri. Areas outside of the State that are included in an SMSA are deleted from the statistics about to be presented. Menard and Clinton counties have been added to the Springfield and St. Louis SMSA's respectively. However, crime statistics for these two counties are not included in their respective SMSA's for this reporting period (1974) in order to maintain the present trend analysis.

SMSA SUMMARY

All seven crime categories making up the Crime Index increased in 1974 compared to 1973. Table 42 represents summary statistics for 1974 versus 1973 for all SMSA's in Illinois as defined above. The SMSA estimated population was 8,993,507 in 1974 accounting for 80.8 percent of the State population and 91.2 percent of the State's Crime Index for 1974. Theft and Burglary represented the highest percent changes with a 20.0 percent increase in 1974 over 1973, followed by forcible rape up 14.8 percent and Murder and Voluntary Manslaughter up 13.6 percent. And finally, Motor Vehicle Theft was up only 1/2 of a percent in 1973.

SMSA CORE CITY SUMMARY

Core Cities are included in SMSA's and account for 4,778,562 inhabitants or 53.1 percent of the total SMSA population and 42.9 percent of the State population. Core Cities also accounted for 67.2 percent of the Total

SMSA Index Crimes and 61.3 percent of State Index Crimes in 1974. Core Cities accounted for 86.9 percent of the Murders and Voluntary Manslaughters committed within SMSA's and represented 83.5 percent of the total Murders and Voluntary Manslaughters that occurred in the State in 1974. Particularly, noteworthy are the figures on Robbery. The Core cities accounted for 90.5 percent of the Robberies within SMSA's and 88.3 percent of the total Robberies that occurred in the State in 1973. Table 43 provides other informative statistics in contrast with Table 42. An analysis of the suburbs will shed more light on this subject.

SMSA SUBURBAN SUMMARY

Suburban areas like Core Cities fall within the SMSA. The suburbs are bounded by the SMSA lines by definition and outside the Core Cities. Total Suburban areas accounted for 4,214,945 estimated inhabitants in 1974, and represented 46.9 percent of the SMSA population and 37.9 percent of the total State population. The Crime Index increased 23.2 percent in the suburbs in 1974 with Burglary representing the highest increase followed by Murder and Voluntary Manslaughter, Robbery, Motor Vehicle Thefts, Thefts, Rapes, Aggravated Assault and Battery in that order. Table 44 presents summary comparison statistics for 1974 and 1973.

RURAL AREA SUMMARY

Rural Areas had a 14.5 percent increase in the Crime Index in 1974 which was attributed by the relatively large increase in Murder, Robbery and Motor Vehicle Thefts as indicated in Table 45. All rural index crimes showed an increase, forcible rapes showed a decrease. Rural Areas accounted for 9.3 percent of the Illinois inhabitants and 2.6 percent of the total Index Crimes. To keep crime statistics in perspective, the index crimes per 100,000 inhabitants or the Crime Rate was 1396.4 for Rural Areas in 1974, 3,211.6 for Other Cities (discussed below), 4001.4 for Suburban Areas and 7,242.4 for Core Cities. Statistics are being collected in 1975 to determine the mobility of offenders by using a 1975 residential code for persons arrested. That is, when a person is arrested by a jurisdiction his place of residence is reported along with other arrest data.

This statistical measurement should indicate crime over-reach from Core Cities into the Suburbs and Rural Areas as well as point to concentrated crime impact programs in a Core City without considering the shifting of crime to more vulnerable and fruitful area.

OTHER CITIES SUMMARY

The Other Cities area consists of 196 cities outside of the SMSA's and within the Rural Areas. These cities account for 9.9 percent of the State's inhabitants and 6.3 percent of the Index Crimes for 1974. Even though the Other Cities population is comparable to the Rural Areas, they experienced an increase in crime in every Crime Index category and consequently the Crime Rate is more than twice the Rural Area. Burglary ranks highest in percent change, followed by Motor Vehicle

Table 42

The OTHER CITIES are urban places outside of the SMSAs. For Uniform Crime Reporting purposes, these are cities or towns outside of the SMSAs that are not under the jurisdiction of the county Sheriff Offices.

ILLINOIS—UNIFORM CRIME REPORTS

1974 OFFENSE SUMMARY

Comprehensive crime statistical data is presented in this part of Crime in Illinois. Tables 47 and 48 represent offense data summarized to the State level. The first column contains the four digit offense code structure related to the Illinois Revised Statutes. The second column entitled Offense Classification, contains the descriptors of each offense code. If some of the descriptors seem to be over-abbreviated, refer to the Introduction where the offense code structure is completely typed with Statute reference numbers. The third column is Offenses Known to Police. The fourth column, Unfounded with sub-columns, number and % means that after investigation of offenses reported to the police, it was determined that a crime didn't occur. The percent column is calculated by dividing the number of unfounded offenses by the offenses known to the police. It is of interest to law enforcement agencies to maintain cognizance of the number of calls for service that come in and actually didn't occur. The fifth column — Referred to Responsible Jurisdiction — means that a jurisdiction was called about an incident, but it was found that the incident location is beyond their jurisdiction, and hence the call is referred to the agency having jurisdiction. Column six — Offenses actually occurred is calculated by adding columns four and five (Unfounded and Referred to Other Jurisdiction) and subtracting this quantity from the Offenses Known to the Police. These are the offenses that the police pursued with investigation and solution, and are used in the Crime Index.

The next group of columns is headed — Offenses Cleared and contains four major columns and eight sub-columns. The first four sub-columns present statistics relating to exceptional clearances. A case is cleared exceptionally when:

1. The investigation has definitely established the identity of the offender, and
2. There is sufficient information to support and arrest, charge, and turn over to the court for prosecution, and
3. The agency knows the exact location of the offender so that he could be taken into custody, and
4. There is some reason outside of police control that stops the police from arresting, charging and prosecuting the offender.

Some examples of exceptional clearances are:

1. Suicide of the offender (the person responsible is dead).
2. Double murder (two persons kill each other).
3. Deathbed confession (the person responsible dies after making a confession).
4. Offender killed by police or citizen.
5. Confession by offender already in custody or serving sentence.

6. An offender prosecuted in another city for a different offense by State or local authorities or prosecuted in another city or State by the Federal Government for an offense which may be the same.
7. Extradition is denied.
8. The victim refuses to cooperate in the prosecution.
9. For some reason outside of the agency's control, an offender is prosecuted for a less serious charge than that for which you arrested him.
10. The handling of a juvenile offender either orally or by written notice to parents in instances involving minor offenses such as petty larceny. No referral is made to juvenile court as a matter of publicly accepted policy.

It is recognized that departmental policy in various police agencies permit the discontinuance of investigation and closing administratively cases in which all investigation has been completed. The administrative closing of a case or the "clearing" of it by departmental policy does not permit the offense to be cleared exceptionally. The recovery of property is not reason to clear a case for UCR purposes. The clearance of a case for I-UCR purposes should have no affect on whether or not the agency's internal policies as to "closing" a case or discontinuing active investigation on a case.

The column — Failed to File a Complaint is of particular interest to law enforcement agencies and is therefore separate from all other reasons for exceptional clearances. Failing to File a Complaint means that the victim refuses to cooperate with the prosecution. For example, there were 27,528 cases exceptionally cleared because the victim refused to cooperate with the prosecution in 1974. This represents 3.1 percent of the total incidents that occurred. All other reasons for exceptionally clearing a case are included in the "other" column.

Offenses cleared by arrest is self-explanatory. Each of the clearance columns is divided into adult and juvenile. The last column of the Offense Summary gives the total clearances (total of exceptionally cleared and cleared by arrest). The clearance rate as defined as:

$$\text{CLEARANCE RATE} = \frac{\text{TOTAL OFFENSES CLEARED}}{\text{ACTUAL OFFENSES OCCURRED}} \times 100$$

This report is produced for each reporting agency and is summarized to the county and state levels. The Crime Index presented in the previous section for each agency is developed from this basic report. For example, Attempted Murder (0121, 0122, 0123 and 0124), Aggravated Battery (0410, 0420, 0430 and 0440) and Aggravated Assault (0510, 0520, 0530, and 0540), added

together makes up the Aggravated Assault category of the Crime Index of the National Program. The data is kept separate by State Statute in the I-UCR Program because the Statutes describe significantly different criminal behavior and are handled differently by the police and the prosecution as well as all other criminal justice agencies.

At the end of the tables are five different totals that must be understood. The Grand Total means the total of all activity. The *Total means the total of incidents not necessarily included in National crime counts and are therefore subtracted for volume comparisons only with the National Program regarding all criminal activity. The Sub-Total (less *) is the total that should be used for comparison purposes. In addition, the Total Attempt to commit a crime are provided for information regarding incompleting crimes, followed by the Adjusted Total, which represents all activity less* and Attempts. We will use the Sub-Total (less *) for the 1974 versus 1973

comparison of crime trends referring to Tables 47 and 48.

In 1974, there were 1,014,518 incidents known to the law enforcement agencies, accounting for an increase of 13.6 percent over 1973. Thirteen percent of these were unfounded in 1973 and 12% in 1974 leaving 778,128 incidents for investigation in 1973 and 887,498 in 1974. In 1973 there were 56,180 offenses Exceptionally Cleared, making up 7.2 percent of the Actual Offenses that occurred. In comparison with 1974 statistics, there were 53,034 offenses exceptionally cleared, representing 6.0 percent of the offenses that were found to have occurred after investigation. It follows then that there was a 5.6 percent decrease in Exceptional Clearances in 1974 over 1973. The Clearance Rates for both 1974 and 1973 are indicated on the Sub-Total (less *) line in the last column of both Tables 47 and 48, which was 35 percent in 1973 and 34 percent in 1974. Therefore the percent of cases cleared by arrest or by exception declined in 1974 compared to 1973.

AGE, SEX AND RACE OF PERSONS ARRESTED AND HELD FOR PROSECUTION OR RELEASED

The total number of persons arrested in 1973 amounted to 504,975 and in 1974, 553,509 persons were arrested. In 1974 there were 553,509 persons arrested for criminal offenses representing an increase of 48,534 arrests in 1974 over 1973 or 9.6 percent. Males represented 85.0 percent of the persons arrested in 1974 and females 15.0 percent. In 1974 males accounted for 85.3 percent, which is approximately the same as 1973. Juveniles accounted for 23.6 percent of the arrests in 1973 and adults 76.4 percent. In 1974, juveniles represented 22.7 percent and adults 77.3 percent, again indicating only a slight difference in 1973 versus 1974.

Based on the U.S. Bureau of Census figures for 1970, the Illinois population was 11,113,976. In 1970, the Bureau reported that Whites accounted for 86.4 percent of the population, Negroes represented 12.8 percent and all other races accounted for the remaining 0.8 percent. Using these same percentages for the 1974 estimated population of 11,131,000, Whites accounted for 9,617,184 Blacks or Negroes 1,424,768 and all other races 89,048. The Arrest Rate is defined the same as the Crime Rate as follows:

$$\text{ARREST RATE} = \frac{\text{TOTAL ARRESTS} \times 100,000}{\text{POPULATION}}$$

Using this formula, the Arrest Rate for Illinois in 1974 was,

$$\text{ARREST RATE} = \frac{553509 \times 100,000}{11,131,000} = 4,972.7 \text{ per one hundred thousand}$$

inhabitants, and in 1973 the Arrest Rate was 4,491.9, representing an increase in 1973 of 10.7 percent.

Considering the White inhabitants only, the Arrest Rate for 1974 was;

$$\text{ARREST RATE} = \frac{289507 \times 100,000}{9,617,184} = 3,010.3 \text{ per one hundred thousand}$$

White inhabitants. The Arrest Rate for Black or Negroes in 1974 was,

$$\text{ARREST RATE} = \frac{224255 \times 100,000}{1,424,768} = 15,739.8 \text{ per one hundred thousand}$$

Black or Negro inhabitants and the Arrest Rate for all other races was 44,635.5 per one hundred thousand inhabitants.

LAW ENFORCEMENT AGENCY INFORMATION

LAW ENFORCEMENT AGENCY INFORMATION

This section of Crime In Illinois contains information about law enforcement agencies, divided into three sections; Law Enforcement Officers Killed or Assaulted/Battered, Law Enforcement Employment Information and Other Law Enforcement Services.

LAW ENFORCEMENT OFFICERS KILLED—1974

There were eleven law enforcement officers killed in Illinois in 1974. Six Chicago police officers were killed by handguns, one Winnebago County Sheriff's veteran detective was killed by a handgun, one Downers Grove patrolman was killed by a handgun, a probationary patrolman with the Chicago Division of the Penn Central Railroad Police Department was killed by a rifle, the Chief of the St. Anne Police Department was killed by a handgun and a Special Agent with the East St. Louis Division of the Illinois Central. A summary of each case was provided by the FBI-UCR Group's publication, Law Enforcement Officers Killed — 1974, and are presented below.

FEBRUARY

A patrolman with the Chicago, Illinois, Police Department for two years was shot and killed during an attempted robbery of a currency exchange. The patrolman, a Negro male 33 years of age, was conducting personal business at the currency exchange when he was accosted by two Negro males. One subject grabbed the patrolman's .38 caliber service revolver and a struggle ensued. While the patrolman was attempting to recover his firearm, the second subject shot him with another .38 caliber handgun. The patrolman sustained gunshot wounds in the back from both firearms. A civilian in the currency exchange attempted to assist the patrolman and was also wounded. The subjects fled the scene with the patrolman's service revolver and escaped.

Two patrolmen of the Chicago, Illinois, Police Department, both white males 28 years of age, were shot and killed while on patrol duty. The patrolmen, both having over three years of law enforcement service, stopped the subject for questioning as he was leaving a tavern en route to his vehicle. The subject, a white male 30 years of age, re-entered the tavern followed by both patrolmen. Upon re-entering the tavern, a scuffle ensued between the subject and the patrolmen. The subject, using a .38 caliber handgun, fatally wounded one patrolman in the head, chest, and abdomen, and the other patrolman in the head. The subject escaped but was fatally wounded the next day in a gunbattle with FBI Agents and officers of the Milwaukee, Wisconsin, Police Department.

MARCH

A six-year veteran detective of the Winnebago County, Illinois, Sheriff's Department, a white male 28 years of age, was shot and killed while attempting to apprehend a robbery suspect. Two white male subjects robbed a bank in Poplar Grove, Illinois. One subject escaped in a getaway vehicle. He abandoned the vehicle and was apprehended while walking on a highway by the Boone County, Illinois, Sheriff's Department. The second subject, 38 years of age, took the bank president hostage and fled the scene in the hostage's private vehicle. The subject then took the hostage to Loves Park, Illinois, where he released the hostage unharmed. Shortly thereafter, the victim detective and his partner located the hostage's vehicle parked near a barber shop. The subject forced one of the barbers out the back door of the shop at gunpoint. The barber escaped from the subject who then ran to a nearby cafe where he was observed by the victim detective and other officers. The victim confronted the subject at the rear corner of the cafe and a gunbattle ensued. The victim detective received a fatal head wound from a .38 caliber handgun. The subject was wounded in the side by the victim detective and apprehended by responding officers.

Two subjects, white males 15 and 14 years of age, allegedly burglarized two residences and fled to a nearby wooded park. A patrolman, a white male 25 years of age, of the Downers Grove, Illinois, Police Department was dispatched to the area in answer to a suspicious persons call. A second officer also responded to the call as a backup unit for the victim patrolman. Upon arriving at the scene, the second officer heard four gunshots and heard from the victim patrolman, via his portable radio, that he had been shot. The second officer radioed for assistance and located the victim patrolman, a law enforcement officer for over a year, lying in a heavy underbrush area of the wooded park. The victim patrolman had been fatally wounded in the chest with a .25 caliber handgun. The victim patrolman had returned gunfire, but the subjects were unharmed. They fled the scene on foot and were subsequently apprehended.

APRIL

A probationary patrolman, a white male 26 years of age, of the Penn Central Railroad Police Department, Chicago, Illinois Division was shot and killed while attempting to make an arrest. The victim patrolman and a lieutenant arrived on the scene in a patrol vehicle to investigate the theft of a water heater from a railroad car. The lieutenant left the victim patrolman with a walkie-talkie radio and instructed him to check an embankment, he observed two male subjects crouched on the embankment. The lieutenant advised the two subjects of his presence and an exchange of gunfire ensued. The lieutenant returned to his patrol vehicle where he

radioed for assistance and attempted to contact the victim patrolman without success. The lieutenant and several Chicago Police Department officers found the fatally wounded victim patrolman a short distance from where he had started to check the embankment. He had been shot in the back of the head with a .30 caliber rifle. Shortly after the shooting incident with the lieutenant, a Negro male 18 years of age, attempted to commandeer a car. As the female driver was getting out of the car, her father, an off-duty Chicago police officer, drove up and attempted to apprehend the subject. The subject fired a .30 caliber rifle slightly wounding the officer in the abdomen. The officer returned gunfire and fatally wounded the subject in the forehead. Two additional subjects, both Negro males 21 years of age, were subsequently apprehended after a gunbattle with Chicago police officers in which another officer was wounded.

MAY

A probationary patrolman, a white male 26 years of age, of the Penn Central Railroad Police Department, Chicago, Illinois, Division was shot and killed while attempting to make an arrest. The victim patrolman and a lieutenant arrived on the scene in a patrol vehicle to investigate the theft of a water heater from a railroad car. The lieutenant left the victim patrolman with a walkie-talkie radio and was checking another embankment, he observed two male subjects crouched on the embankment. The lieutenant advised the two subjects of his presence and an exchange of gunfire ensued. The lieutenant returned to his patrol vehicle where he radioed for assistance and attempted to contact the victim patrolman without success. The lieutenant and several Chicago Police Department officers found the fatally wounded victim patrolman a short distance from where he had started to check the embankment. He had been shot in the back of the head with a .30 caliber rifle. Shortly after the shooting incident with the lieutenant, a Negro male 18 years of age, attempted to commandeer a car. As the female driver was getting out of the car, her father, an off-duty Chicago police officer, drove up and attempted to apprehend the subject. The subject fired a .30 caliber rifle slightly wounding the officer in the abdomen. The officer returned gunfire and fatally wounded the subject in the forehead. Two additional subjects, both Negro males 21 years of age, were subsequently apprehended after a gunbattle with Chicago police officers in which another officer was wounded.

JUNE

A Chicago, Illinois, Police Department patrolman with over one year of law enforcement service was fatally wounded after responding to a disturbance matter. The patrolman, a white male 29 years of age, and a second officer were on a vehicle patrol when they heard gunfire at a nearby tavern. The patrolman entered the front door of the tavern while the second officer entered the side door. The second officer observed one subject, a white male 42 years of age, armed with a handgun and ordered him to drop the weapon. During an exchange of gunfire, the second officer was seriously wounded and the subject was wounded in the shoulder. At the same time, a second white male subject, seated in the rear of

the tavern, allegedly fired a .38 caliber handgun at the patrolman fatally wounding him in the shoulder and back. One subject was apprehended at the scene by responding officers and the second subject escaped.

JULY

A Chicago, Illinois, Police Department sergeant was shot and killed during an armed robbery of a tavern. The off-duty sergeant, a Negro male 54 years of age, was in civilian clothes visiting in the tavern owned by his uncle. One subject entered the tavern, asked for change to use the telephone and left. This subject returned shortly with two companions and announced a robbery. The sergeant, sitting in the rear of the tavern with other patrons, identified himself as a police officer. During an exchange of gunfire, the sergeant, a 24-year veteran officer, was fatally wounded in the chest with both .38 and .22 caliber handguns. The three subjects, Negro males 23, 19 and 16 years of age, stole the sergeant's service revolver and completed the robbery. They escaped the scene but were subsequently apprehended.

AUGUST

A Chicago, Illinois, Police Department sergeant was shot and killed during an armed robbery of a tavern. The off-duty sergeant, a Negro male 54 years of age, was in civilian clothes visiting in the tavern owned by his uncle. One subject entered the tavern, asked for change to use the telephone and left. This subject returned shortly with two companions and announced a robbery. The sergeant, sitting in the rear of the tavern with other patrons, identified himself as a police officer. During an exchange of gunfire, the sergeant, a 24-year veteran officer, was fatally wounded in the chest with both .38 and .22 caliber handguns. The three subjects, Negro males 23, 19, and 16 years of age, stole the sergeant's service revolver and completed the robbery. They escaped the scene but were subsequently apprehended.

The Chief of Police of the St. Anne, Illinois, Police Department was shot and killed while attempting to quell a disturbance among three individuals. The Chief, a white male 38 years of age, was accompanied by his wife in a marked patrol vehicle. He was questioning three subjects when he observed one of the subjects drop a .22 caliber handgun. The Chief seized the weapon; however, the three subjects retrieved it from him. The three subjects attempted to disarm the Chief and in the ensuing struggle, the Chief was fatally wounded in the side with the .22 caliber handgun. The Chief's wife obtained her husband's .357 magnum service revolver and shot and killed two of the subjects, white males 30 and 25 years of age. The third subject, a white male 25 years of age, fled the scene on foot and was subsequently apprehended.

OCTOBER

A Special Agent with the Illinois Central Gulf Railroad, East St. Louis Division, was shot and killed while attempting to apprehend four burglary subjects. The Agent was one of several officers assigned to maintain surveillance of an area in a railroad yard where numer-

ous burglaries had occurred. The Agent, a white male 29 years of age, observed two of the four Negro male subjects attempting to open the door on a railroad boxcar. He radioed to the other officers that a third subject was armed with a rifle. Shortly thereafter, gunfire was heard and the Agent was found lying on the ground. The Agent, a law enforcement officer for six years, had been shot in the head with a 30-06 rifle. One subject, 20 years of age, was apprehended at the scene. The other three subjects, 29, 20 and 19 years of age, were apprehended shortly thereafter.

DECEMBER

An off-duty Chicago, Illinois, Police Department patrolman was the victim of an attempted armed robbery. The patrolman, a white male 36 years of age, and his son were in a shopping center parking lot when they were approached by three Negro male subjects. One subject approached the patrolman from the rear and announced a holdup. The patrolman attempted to draw his service revolver and was fatally wounded in the back with a .22 caliber handgun. The patrolman's son was wounded in the face. The patrolman returned gunfire at the fleeing subjects. The three subjects, one 17 and two 15 years of age, and a fourth Negro male subject, 18 years of age, were apprehended shortly thereafter.

LAW ENFORCEMENT OFFICERS ASSAULTED/BATTERED

Table 52 is a summary of law enforcement officers killed or assaulted or battered. There are three major divisions in this table viz., (1) Type of Weapons Used, (2) Type of Assignment, and (3) Police Assaults/Batteries Cleared.

The type of weapon refers to the subject's use of a weapon to assault or batter a police officer. The type of assignment means deployment technique for patrol and answering calls. For example; one column is head "2-man vehicle" — 2 men were assigned to a vehicle and were assaulted or battered 1,102 times with this deployment technique. When a "1-man vehicle" is deployed with an assist from another "1-man vehicle" the assaults and batteries amount to 309 incidents. The last column of the table displays "cases cleared by arrest" by type activity. The table indicates that 2055 cases were cleared by arrest out of 2,289 (first column total) cases that occurred or the clearance rate was 94.0 percent.

Item 15, "Time of Assault" is divided into AM and PM. Note that between the hours of 1001-1200 P.M. through 1201-0200 AM represents 677 incidents out of 2,289 or 29.6 percent of the incidents that occurred in this 4 hour span out of the 24 hour day. The table also shows that the highest frequency of occurrence in the Type Weapons area was when answering disturbance calls followed by Attempting Other Arrests, Traffic and Handling Prisoners.

LAW ENFORCEMENT EMPLOYMENT INFORMATION

The total law enforcement personnel as of October, 1974 amounted to 30,760 employees.

Part-time employees accounted for 2,525 employees or 8.2 percent. Civilians represented 3,782 employees or 12.3 percent of the total. Full-time employees (sworn officers) amounted to 24,453 employees or 79.5 percent of the total employees on the payroll in October of 1974.

The percent of Civilian employees relative to Full-Time and Part-Time for the police was 13.9 percent. For the sheriffs, the percent Civilian employees represented 15.4.

The number of employees per 1000 inhabitants for the police was 2.9. The National average was 2.5 police officers per 1000 inhabitants. Sheriffs had 1.4 employees per 1000 inhabitants. Law enforcement employees per 1000 inhabitants should not be used as it relates to the Index Crimes, because other crimes and many services performed by the typical police or sheriff's office amounts to over 80 percent of their workload which usually remains unpublished. Again, each community should consider all the factors related to causes of crime and determine the role of the department relative to crime and services that are required.

Calculation of employees per 1000 inhabitants is accomplished by using this formula:

$$\text{EMPLOYMENT RATE} = \frac{\text{NUMBER OF EMPLOYEES} \times 1000}{\text{YOUR JURISDICTIONAL POPULATION}}$$

EXAMPLE:

Your department has 60 employees. What is the manpower ratio per 1000 inhabitants when your current population is 51,000 inhabitants?

$$\text{ER} = \frac{60 \times 1000}{51,000} = 1.76 \text{ or } 1.8/1000 \text{ inhabitants}$$

If you want the full-time sworn officers per 1000 inhabitants use the same formula and use the number of full-time officers that you have.

Specific law enforcement information is included in the following tables. Table 53 is a listing of police departments ranked by population. Table 54 is an alphabetical listing of Sheriff's Offices and related employment information. Following Table 54 is a list of Colleges and Universities that are on the I-UCR Program. Table 55 also shows location without a jurisdictional population. And Table 56 shows other law enforcement agencies that are on the I-UCR Program excepting the Illinois State Police. In 1975, 18 additional Park Districts and the Department of Conservation's Law Enforcement Division will be on the Program.
